Filipino ●

## PROFILE INFO

I am aspiring Front End Web Developer with over 10 years of experience in the Hotel industry. Working in an environment where everything should be done elegantly while focusing on every detail to exceed guest expectations makes me interested in connecting it with building outstanding web projects. After being forced to change course in my life due to war, I discovered my passion for web development. As a self-taught, learning from scratch is quite challenging but the process is really exciting. I am eager to work with experienced professionals and further expand my knowledge, ultimately becoming a valuable asset to the tech industry.

- Currently taking my second JavaScript course in order to explore a new learning approach for the language.

## WORK EXPERIENCE

**Waiter In-Charge** **2016 - 2021**  
**Princess Cruises**

I joined the company as a waiter and have been working as waiter in-charge as part of my training for the next position. I was responsible for overseeing the day-to-day operation of the restaurant and ensuring that it meets the company's service, health and safety standard.

**Head Waiter Trainee** **2011 - 2016**  
**Silversea Cruises**

My first cruise company where I started at the bottom position and worked my way up to a headwaiter trainee position. Awarded as Employee of the month on my first contract.
